

Logistics support for Arctic field work

partnerships@bas.ac.uk

British Antarctic Survey, High Cross, Madingley Road, Cambridge, England, CB3 0ET, UK

Through the UK Arctic Office, British Antarctic Survey (BAS) offers logistical support to researchers undertaking climate science in the Arctic. BAS supports field operations with light aircraft, ice-strengthened research ships and experts in field safety.

Aircraft operations

Ship operations

Field operations

Twin Otter aircraft

Modified for airborne research and deployment of deep-field parties.

Ice-strengthened research ships

RRS *James Clark Ross*

RRS *Ernest Shackleton*

Field safety staff

Expert support for scientists and researchers living and working in the deep field.
