What is PROPOLAR ?

PROPOLAR – Infrastructures and Logistics

- 🌐 Coordinated by 5 research institutions from 4 Universities
- 🌐 Biannual funded project (FCT): flight freight, travel support, insurance and management
- 🌐 Connected with the Polar Office from FCT (Dra. Ana Quartin)
- 🌐 Coordinates mobility grants for young scientists
- 🌐 Opens calls for Polar Science Projects (34 reviewers from 15 countries)
- 🌐 Advices researchers for access to Polar Regions
- 🌐 Coordinates logistics and international contacts with partner programs

What PROPOLAR does?

Project calls

Logistics

Support

Workshops

Education

Training

International

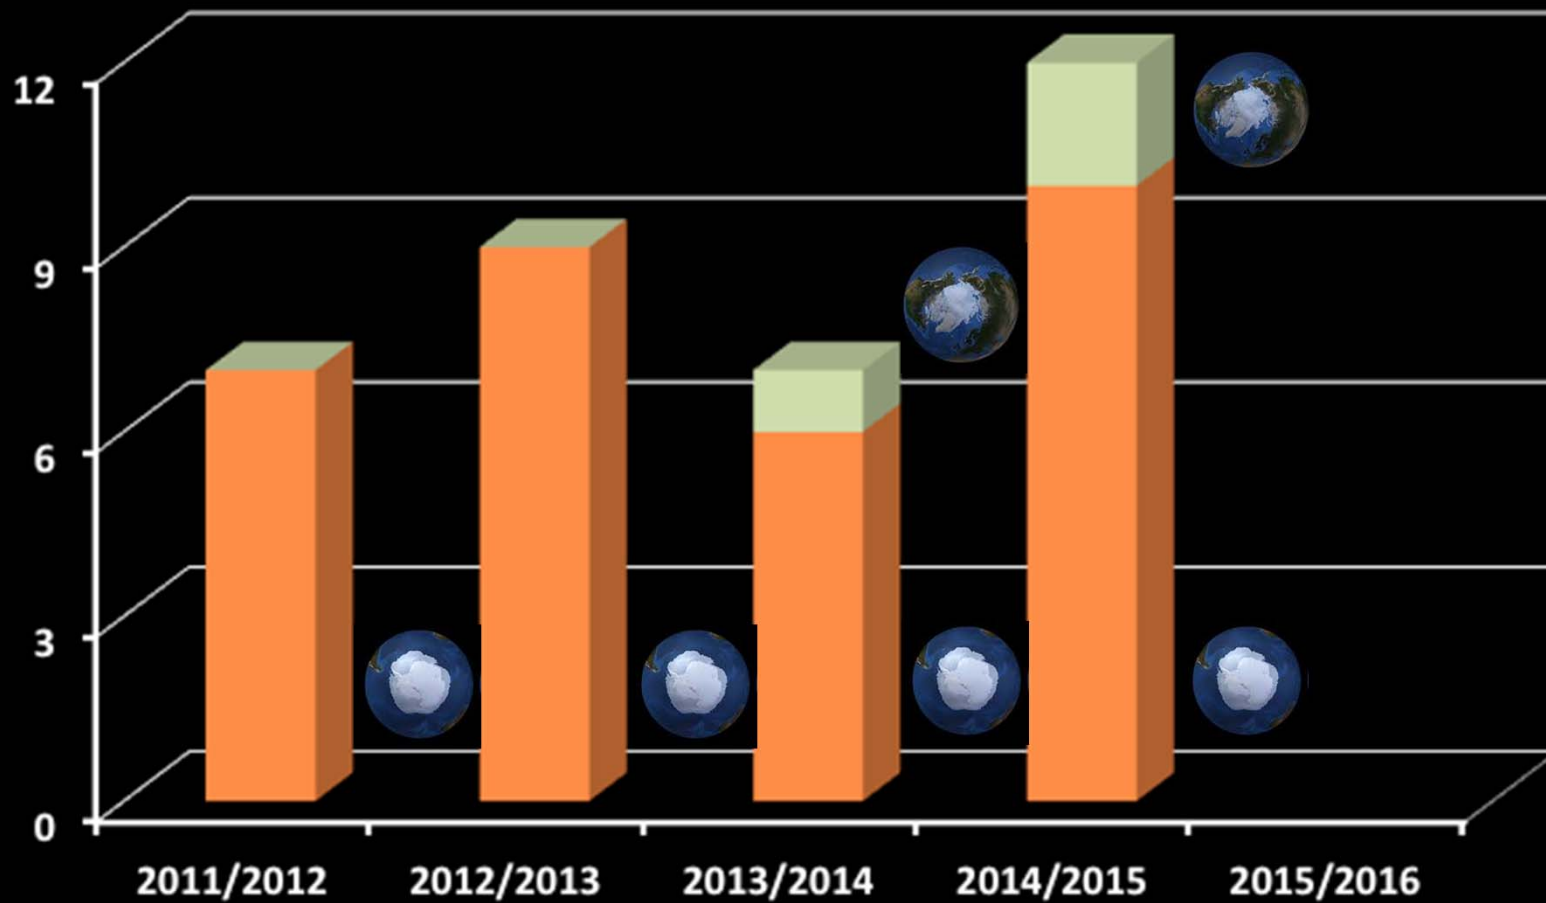

Annual Science Meetings

International Cooperation

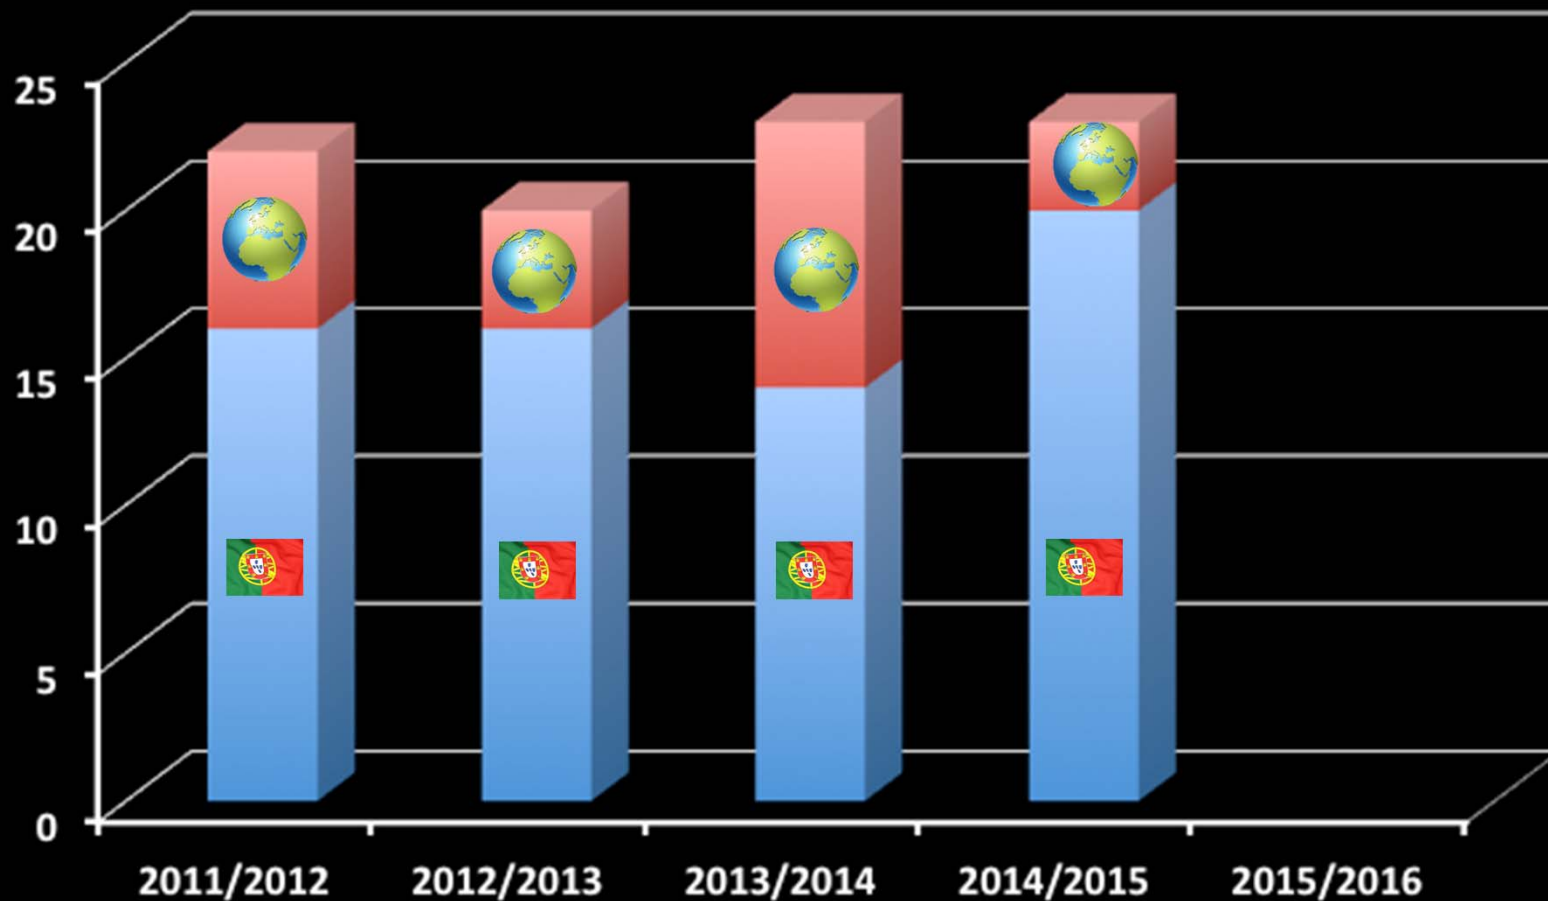

Atmospheric | Biological | Cryospheric | Earth, Environmental and Marine | Social | Architecture

Number of funded Projects

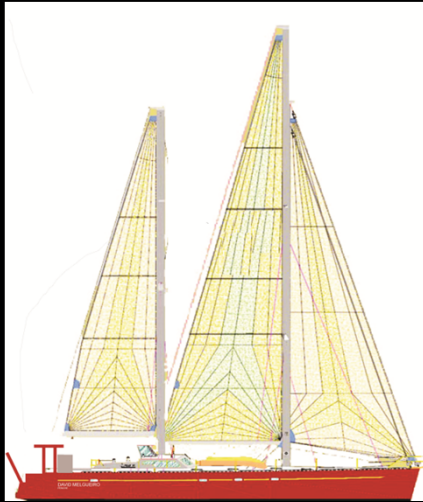

Number of researchers involved (field)

David Melgueiro

Private project with the scientific support of PROPOLAR

- ✓ Ketch-type sailing craft; its hull will be made of steel and its deck of stainless steel – Ice class
- ✓ Equipped with a tillable gantry to be used to launch scientific equipment overboard.
- ✓ Natural, recyclable and innovating materials will be used whenever possible during the whole building process.
