## “The Future of Research Infrastructure in the Arctic”

Organized by members of ARICE, INTERACT, FARO & EPB!

The Arctic is currently one of the most rapidly changing regions in the world. Arctic research infrastructure is key to conducting world-class science in this region, characterized by extreme environmental conditions and difficult-to-access areas. What does the future of research infrastructure in the Arctic look like and what are the possible solutions to the new challenges?

Topics under discussion at this event will include:

- Arctic research infrastructures in a global context
- Infrastructure responses to societal challenges
- Providing access to the Arctic
- New technology for new research
- Building infrastructure resilience to future challenges

\*Lunch, coffee breaks, and cocktails after the event are included
