Operators of Canada's Arctic Research Infrastructure

OCARI is an operator-focused network consisting of research facilities across Northern Canada, including year-round research laboratories and stations, seasonally operated field camps, community research facilities, sites for long term biophysical observation, monitoring sites, and research vessels.

OCARI facilities are operated by academic organizations, non-governmental organizations, and a variety of government organizations.

This network offers an opportunity for Canada's Northern research facility operators to share information related to research operations, identify areas of common concern, and to develop opportunities for facility operators to collaborate with each other when it makes sense to do so.

OCARI will provide an access point for Canadian and international research teams to quickly and easily assess research facilities and potential partners across Northern Canada and help Operators develop new clients for their facilities.

Coordination support for the network is provided by Polar Knowledge Canada.

OCARI

Our Mission

To advance the collective interests of Canada's northern research infrastructure operators through coordination, outreach, and joint action to help them achieve excellence in technical and logistical support individually and as a network.

Our Goals

- Support exemplary science and knowledge creation in Canada's North as a means of advancing the sustainable well-being of Northerners, northern communities and Canadians as a whole.
- Fully address Canada's international obligations for Arctic data collection and knowledge exchange within the circumpolar world.
- Strengthen the many northern communities and regions in which our facilities are based.

Operators of Canadian Arctic Research Infrastructure

Providing the infrastructure that makes research possible in Canada's Arctic and sub-Arctic regions.

Explore Our Research Facilities

Across Northern Canada, the network includes permanent research stations and seasonal field camps to community labs, monitoring sites, and mobile platforms. OCARI facilities are managed by universities, non-profit organizations, as well as municipal, provincial, and federal government partners.

Tundra Ecosystem Research Station

64.8670, -111.5925

Owner and/or Operator	Government of the Northwest Territories (GNWT)
Location	Daring Lake, Northwest Territories, about 300 km northeast of Yellowknife, 50 km north of the treeline (64°52'01"N; 111°35'33"W)
Nearest community incl. Province	Wekweeti (150 km), Northwest Territories
Access	Float plane
Infrastructure on Site	10 Weatherhaven tents; bunkhouses; kitchen;
