

# Netherlands Polar Programma

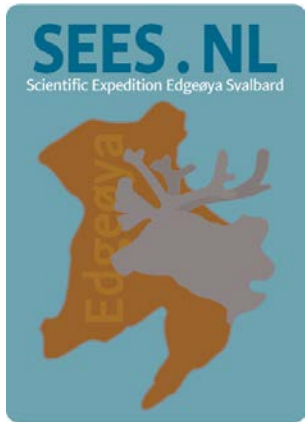

Daan Blok

FARO Annual meeting | march 26, 2022

# Covid impacts on 2020-2021 arctic fieldwork

- Cancellation fieldwork to mostly Siberian tundra sites, large impacts on projects (2-year delay), currently even more pressing due to Ukraine conflict.
- Some monitoring and measurements could be continued by local partners.
- In other cases, fieldwork location could be moved to other arctic locations (Svalbard).
- Monitoring at Ny-Ålesund could be continued both in summer 2020 and 2021, although at higher costs for quarantine, permits and insurance.

# SEES.NL 2022

Netherlands Scientific Expedition Edgeøya Svalbard

Kapp Lee, Edgeøya, 1968

SEES.NL is a continuation of the Netherlands research expeditions on Edgeøya between 1966, 1988 and 2015.

Interdisciplinary programme, including natural and social sciences.
